Quick Start Guide

In This Box
- Base & Power Cord
- Activator Bottle
- 5 Activator Capsules
- Spray Bottle
- On-The-Go Spray Bottle
- Quick Start Guide
- User Manual

Making Force of Nature can be fun and educational for kids to participate in too, so check out the kid-friendly science on the back of this page.

Force of Nature should always be used with adult supervision and is not intended for use by children without direct adult supervision.

Review the User Manual before using this product.

Tips
If at first the Spray Bottle won’t dispense, pull the trigger multiple times until it dispenses.

If error (ERR) message appears, wait 10 seconds then press Start Button twice at the top of the Activator Base and release.

If nothing happens after pressing the Start Button, unplug the base, wait 20 seconds, then plug the base back in again and ensure that the Activator Bottle is correctly placed on the contacts on the Base. Press the Start button again.

If you want to make more than 1 bottle at a time, unplug the base for 10 seconds, then plug it back in before making your second bottle.

Force of Nature keeps its disinfecting power for 2 weeks, so the display on the base will count down 14 days starting from the day you made it. If you don’t want to keep Force of Nature plugged in, just write the expiration date with a non-permanent marker in the space provided on the back of the Spray Bottle.

Store your all-purpose cleaner at room temperature away from direct sunlight.
Fun For Kids

Experiments to Try with an Adult
You might know that bacteria is a type of germ. Bacteria can be the chief culprit in some of the stinky smells in your house, like rotten fruit, your dog’s breath, cat litter, the diaper pail, or smelly shoes. To see how Team Hypochlorous Acid conquers odor-causing bacteria, try these experiments:

1 - Get a timer or use the timer app on a smartphone. Spray Force of Nature on a smelly piece of sports equipment, like a helmet, pads, or guards. Wait 30 seconds then sniff. Did the smell go away? If not, how long did it take?

2 - Find the smelliest pair of shoes in your house. Spray one with Force of Nature. Wait 30 seconds and compare the shoes. Which one smells better?

Now think of your own experiments to test how fast Team Hypochlorous Acid combats nasty smells.

Have fun!

What’s the science behind those bubbles?

The salt, water and vinegar solution is made up of tiny molecules. Think of each molecule as a little team and the team members are called elements.

When you push Force of Nature’s start button, an electrical current breaks apart the molecules. The bubbles are the elements getting ready to form new teams.

Now the elements bond into new teams, each with a new goal. The vinegar’s job is to create just the right playing field for the new teams to form by lowering the acidity of the solution.

A Mighty Multi-Tasker
- Gives a 99.99% germ-free clean
- Eliminates tough odors – trash cans, sports equipment, shoes, cat litter boxes, pet accidents
- Safe enough to use on hands
- Safely disinfects baby-gear - pacifiers, highchair trays, bibs, toys, strollers, car seats
- Disinfects on-the-go – great for germy surfaces like shopping carts, doorknobs, cars, airplane seat areas

Mission: To clean messes big & small
Mission: To kill off nasty germs & smells
