

10 TIPS & TRICKS

FOR DISINFECTING YOUR SALON WITH  FORCE of NATURE™

1

Know the difference: Cleaning vs. Disinfecting

Cleaning is a good first step, because it removes dirt and residue, but disinfecting is a regulated term meaning the product kills 99.9% of germs and bacteria. Do both!

2

Spray Down Your Waiting Room

Between clients, disinfect your waiting room including seating and table surfaces, and remove any shared items like magazines or makeup samples.

3

Keep Break Rooms Clean and Germ-Free

If you have a breakroom for your team, make sure it's clean and disinfected by frequently wiping down commonly touched surfaces with Force of Nature.

4

Treatment Tables, Too!

Between treatments, disinfect with Force of Nature and wipe dry with a cloth. Force of Nature is certified SkinSafe by the Mayo Clinic and free of top allergens.

5

Go Contactless

Take advantage of contactless payment options and digital appointment confirmations and reminders, both to simplify your life and cut down on handling of credit cards, pens and screens. It's a win-win!

6

Disinfect Salon Chairs

between uses by spraying down with Force of Nature and wiping dry with a soft cloth. No need to rinse!

7

Hair Tools, Combs, and Brushes

Hypochlorous acid (our active ingredient) is gentle enough to spray on your skin, so you can disinfect styling tools with a spray of Force of Nature or by wiping them down with a cloth soaked in FoN. Make sure any heat tools you spray are unplugged and cool before disinfecting.

8

Disinfect Gadgets

Give computers, phones and tablets a wipe down with a cloth that has been sprayed with Force of Nature to disinfect their surfaces. Never spray liquid directly onto electronics!

9

Don't Forget Refreshments

If you're offering coffee, tea, and snacks, you can use Force of Nature to disinfect surfaces without worrying about using harsh cleaning chemicals around food and drink items. Our active ingredient is the same chemical your own immune system produces to fight infection!

10

Prioritize High Touch Areas

Disinfect high-touch areas like light switches, door handles and bathroom surfaces with a spray of Force of Nature.
